

SpeakHire — Student Evaluation Metrics

DB — Interns CSV / FULL DB

SV1 — FY Exit Survey (79 students)

SV2 — IR Exit Survey (759 responses)

SV3 — Leadership Course Survey (337)

SV4 — Seminars Survey (589)

AQ — Alumni Survey (to be administered)

Filled — ≥75% fill rate in actual data

Partial — Subset of students or 20–74%

Pending — Not yet collected

READY TO SCORE

2 Matrices

Core columns are verified Filled in the Interns CSV — no waiting required

01 Session Commitment

READY

Did this student consistently show up? This is the most data-complete matrix in the dataset. Every session count column in the Interns CSV is 100% filled. We track total attendance volume, round-by-round breakdown, the ratio of attended to scheduled sessions, whether the student graduated and earned recognition, and whether they went beyond the minimum by joining the Summit, Camp, or Exploratory Years. High attendance predicts stronger outcomes across every other matrix.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	Total sessions attended	DB	Total Sessions Attended (Interns CSV col 323) <i>Verified fill: 100% across 1,778 students</i>	Filled
2	Session attendance rate	DB	Total Sessions Attended ÷ Total Sessions Scheduled (both 100% filled — ratio computed) <i>Sessions Attended vs. not attended ratio also in FULL SpeakHire Database</i>	Filled
3	Round-by-round attendance	DB	Total IR1 Sessions Attended · Total IR2 Sessions Attended · Total IR3 Sessions Attended · Total IRS (Summer) Sessions Attended (Interns CSV cols 132–134, 481) <i>All four columns verified 100% filled. Value = 0 for rounds not participated in.</i>	Filled
4	Self-reported session count	SV2	How many sessions did you complete? (IR Exit Survey) · What Internship Round did you just complete? <i>99% fill within SV2 respondents (759 responses)</i>	Partial
5	Absence explanation	SV2	Can you explain if you completed less than 9 sessions? (Open Text, IR Exit Survey) <i>99% fill within SV2 respondents. Reveals barriers to completion.</i>	Partial
6	Program graduation and recognition	DB	FY Graduate (Y/N, Interns CSV col 281 — 85% filled) · Award Recipient (Interns CSV col 99 — 100% filled)	Filled
7	Above-minimum participation	DB	SPEAKHIRE Summit (Y/N) · Summer Camp (Y/N) · Exploratory Years (Y/N) (Interns CSV cols 33–35) <i>All three verified 100% filled. Y = opted into above-minimum programming.</i>	Filled

Does this student know what career they want and how to reach it? Two DB columns are fully filled (Main Career Field and Main Career Interest at 75%), providing an immediate baseline for every student. Survey data from all three program-phase surveys adds depth: how much their career thinking grew round-to-round, what they learned in the leadership course cohort, and whether seminar speakers concretely shaped their pathway thinking.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	Career field on record	DB	Main Career Field (Staff Fill) (Interns CSV col 26 — 75% filled) · Main Career Interest (Autofill) (col 27 — 75% filled)	Filled
2	Job title specificity	DB	First Choice Job (Interns CSV col 37 — 44% filled) · Second Choice Job (col 38 — 20% filled)	Partial
3	Career awareness baseline	DB	FY1 — Know Appropriate Careers (Interns CSV col 126 — 49%) · Know How To Pursue Careers (col 128 — 48%) · Have Skills to Succeed in Career (col 131 — 48%)	Partial
4	Career consideration growth from rounds	SV2	Are you now considering what careers you're interested in more than before? (IR Exit Survey, 64%) · Did this Internship Round help you better understand your career pathway? (63%) · I feel more prepared for my future career (72%)	Partial
5	Decision-making confidence growth	SV1	I have a better understanding of what careers are appropriate for me (FY Exit Survey) · I have a better understanding of how to pursue the career I am interested in · I can make more informed decisions about my future <i>70% fill within SV1 respondents (79 FY completers)</i>	Partial
6	Career learning from leadership course	SV3	Are you now considering careers more than before? (Leadership Course Survey, 100%) · I know what careers are appropriate for me (98%) · What are some future careers you're considering? (Open Text, 99%) · List 5 things you learned about the career of your cohort (Open Text, 66%) <i>Covers 337 leadership course participants only</i>	Partial
7	Career inspiration from seminar speaker	SV4	The topic helped me think more about my future career pathway and what I need to do to reach it (79%) · The topic inspired me to think more about my future career (79%) · The Seminar speaker gave me tips to become a future workforce professional (79%) <i>Covers 589 seminar attendees</i>	Partial

MIXED

6 Matrices

Blend of Filled and Partial columns — can generate partial scores now, improve as comms team fills FY2 fields

Did this student build a concrete, informed college plan through the program? The DB baseline columns (FY1 college awareness, FY1 college readiness) are partial but present for roughly 38% of students. Survey data from SV1, SV2, and SV3 captures self-assessed readiness growth, college application steps taken in sessions, college lists created, and whether speakers from target institutions shaped aspirations. Post-program college enrollment is in the FULL DB.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	College awareness at program entry	DB	FY1 — Know Appropriate Colleges (Interns CSV col 140 — 37%) · FY1 — Feel College Ready and Prepped (col 124 — 38%)	Partial
2	College readiness growth self-report	SV1	I have a better understanding of what colleges are appropriate for me (FY Exit Survey, 100%) · I feel I am now a stronger candidate for college and careers (70%) · I know about more colleges than I did before (70%) · I feel I am now more prepared for college (70%)	Partial
3	College readiness in rounds	SV2	I know what colleges are appropriate for me (IR Exit Survey, 63%) · I feel ready and prepared for college (63%) · This experience made me focus more in school and want to do better (63%)	Partial
4	Active college application steps	SV2	Worked on college application process (IR Exit Survey, 38%) · Talked about and looked into different possible college options (30%) <i>Session-level college engagement — lower fill because conditional on having that session topic</i>	Partial
5	College list created	SV2	List up to 10 colleges you are now interested in (Open Text, IR Exit Survey — 55%) <i>Richly scoreable: list length and selectivity reveal aspiration depth</i>	Partial
6	College consideration from leadership course	SV3	I have thought more about colleges because of this course (Leadership Course Survey, 44% fill) · Did any speakers attend the colleges you're interested in? (40%)	Partial
7	Post-program college enrollment	DB	College Attended (FULL SpeakHire Database — post-program outcome record)	Partial

Does this student contribute to their community and develop openness to people different from themselves? Volunteering baseline data exists in the Interns CSV at roughly 48% fill. Survey data from SV2 captures active volunteering participation during each round. The post-course leadership measure for including others who are different is available for all 337 course participants at 99% fill within SV3. Two alumni questions complete the civic profile once administered.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	Volunteering history at entry	DB	FY1 — Ever Volunteered? (Y/N, Interns CSV col 86 — 48%) · FY1 — Hours Volunteered (col 45 in Interns CSV)	Partial
2	Active volunteering during program	SV2	Did you participate in any volunteering opportunities in your community during this Internship Round? (Y/N, IR Exit Survey — 63%) · About how many hours have you volunteered so far? (63%)	Partial
3	Cross-cultural inclusion growth	SV3	... include others who are different from you — diversity and inclusion? (Post-course Likert, Leadership Course Survey — 99% of 337 participants) <i>Also: After meeting Champions and peers, I better understand people who are different from me (SV1 — 70%)</i>	Partial
4	Community belonging during program	SV2	How does your community make you feel? (Open Text, IR Exit Survey — 63%) · This experience made me focus more in school and want to do better (63%)	Partial
5	Community connectedness	AQ	Q1: On a scale of 1–7, how connected do you feel to your community (school, neighborhood, or professional)?	Pending
6	Constructive conflict approach	AQ	Q3: On a scale of 1–7, how do you typically handle conflicts with peers or colleagues? (1 = avoid entirely, 7 = address directly and constructively)	Pending

Has this student built a meaningful professional network through the program? Baseline mentor counts and career-field contacts exist in the Interns CSV at roughly 39–41% fill. SV1 captures whether the student understood the value of networking after the FY year (asked of all 79 FY completers). SV2 captures active networking behaviour during each internship round. Note: Y2 columns (contacts retained) are <2% filled in the current database.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	Mentor count at entry	DB	Mentors/Counselors # (Interns CSV col 83 — 39% filled) <i>How many career coaches or mentors does the student have at program entry</i>	Partial
2	Career-field contacts at entry	DB	FY1 — # of Individuals in Careers of Interest (Interns CSV col 84 — 41% filled)	Partial
3	Network value understanding	SV1	This SPEAKHIRE Foundational Year helped me understand the value of building a strong network (FY Exit Survey — 100% of 79 students) · I made new friends during the Foundational Year (70%)	Partial
4	How many career coaches or mentors in network	SV1	How many career coaches or mentors do you currently have in your network? (FY Exit Survey — 70%) · How many individuals do you know who work in the career you are interested in? (70%)	Partial
5	Active networking in internship rounds	SV2	Were you introduced to diverse career professionals who you can relate to during this Internship Round? (IR Exit Survey — 64%) · This may be the end of the round — did you find a way to stay in touch? (63%)	Partial
6	Speaker connections from leadership course	SV3	Are there any speakers you would like us to connect you to? (Open Text, Leadership Course Survey — 44% fill)	Partial

Can this student speak up, write professionally, and communicate across cultural and language boundaries? The Session Feedback file records whether Communication was the skill practiced in each session. SV3 provides the active listening growth delta. SV4 captures whether seminar speakers were relatable communication role models. Three alumni survey items — group speaking confidence, cross-cultural initiative, and professional writing — will complete this matrix once administered.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	Communication skill focus rate in sessions	DB	What skill did you cover? · What component skill did you cover? (Internship Session Feedback — rate of sessions where Communication was the primary skill covered)	Filled
2	Active listening growth	SV3	... listen to others? (Post-course Likert, Leadership Course Survey — 99% of 337 participants) <i>Pre-course baseline: Pre — Listen (Interns CSV col 307, 44% filled). Delta requires matching both.</i>	Partial
3	English language development	SV1	improve my English language skills (entry motivation signal, FY Exit Survey) · School belonging via language confidence: Meeting with my Champions during school helped me feel like I belong in school (70%)	Partial
4	Relatable speaker as communication role model	SV4	The Speaker was someone I could relate to, a visible role model who makes me realize I can be successful too (Seminars Survey — 79% of 589 attendees)	Partial
5	Group speaking confidence	AQ	Q5: On a scale of 1–5, how confident are you speaking up in a group discussion when you disagree with the majority view?	Pending
6	Cross-cultural communication initiative	AQ	Q6: On a scale of 1–5, how often do you initiate conversations with people from a different cultural or language background than yours?	Pending
7	Professional writing confidence	AQ	Q7: On a scale of 1–5, how confident are you writing a professional email to a stranger (e.g., for a job, internship, or college inquiry)?	Pending

How grounded is this student in their own cultural identity, and how open are they to the wider world? SV1 captures cultural values alignment and cross-cultural understanding growth at FY exit. SV2 captures community belonging per round. SV4 measures whether the seminar speaker was someone the student could genuinely relate to — a key signal for immigrant-background and first-generation students. Alumni questions Q1 and Q2 add a longitudinal self-assessment layer once administered.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	Cultural values and career alignment	SV1	I understand how my cultural values can shape my career choices (FY Exit Survey — 70% of 79 FY completers)	Partial
2	Cross-cultural understanding through program	SV1	After meeting Champions and working with other peers, I better understand people who are different from me (FY Exit Survey — 70%)	Partial
3	Community belonging per round	SV2	How does your community make you feel? (Open Text, IR Exit Survey — 63%) <i>Open-text community feeling: qualitatively scoreable for belonging vs. alienation</i>	Partial
4	Diverse professional exposure	SV2	Were you introduced to diverse career professionals you can relate to during this Internship Round? (IR Exit Survey — 64%)	Partial
5	Speaker as visible role model	SV4	The Speaker was someone I could relate to, a visible role model who makes me realize I can be successful too (Seminars Survey — 79% of 589 attendees) · The Speaker inspired me to think more about my future career (79%)	Partial
6	Community connectedness (alumni)	AQ	Q1: On a scale of 1–7, how connected do you feel to your community (school, neighborhood, or professional)?	Pending
7	Cultural self-awareness (alumni)	AQ	Q2: On a scale of 1–7, how well do you understand how your cultural background has shaped your career path and personal values?	Pending

Does this student set real goals with deadlines and act on them? SV2 captures open-text SMART goals set at the end of each internship round (63% fill across 759 responses). SV3 provides a post-course Likert on goal-setting skill (99% within 337 course students). SV1 captures aspiration and planning mindset signals. The pre-course goal-setting baseline exists in the Interns CSV at 44% fill. Alumni question Q9 adds a long-term behavior frequency measure once administered.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	SMART goal set at round end	SV2	Let's set a SMART goal for this next Internship Round (Open Text, IR Exit Survey — 63% of 759 responses) <i>Scoreable on specificity, measurability, and time-boundedness via NLP</i>	Partial
2	Goal-setting skill self-assessment (post-course)	SV3	... setting and reaching your goals? (Post-course Likert, Leadership Course Survey — 99% of 337 participants) <i>Pre baseline: Pre — Goal-setting (Interns CSV col 308 — 44% filled)</i>	Partial
3	Aspiration and forward-planning signals	SV1	The Foundational Year helped me realize that doing well in school connects to my future career goals (FY Exit Survey — 100% of 79 students) · I can make more informed decisions about my future (70%) · feel inspired to work hard towards my future (motivation signal, 70%)	Partial
4	Recommendation rate as program forward-commitment	SV2	I would recommend the SPEAKHIRE Foundational Year to my friends (Likert, IR Exit Survey — 63%) <i>Students who advocate for the program are more invested in their own forward trajectory</i>	Partial
5	Written goal frequency (alumni)	AQ	Q9: On a scale of 1–5, how often do you set written goals for yourself with a clear deadline?	Pending

PENDING ALUMNI SURVEY

2

Matrices

Core scoring columns are Alumni Survey items Q10–Q22 — not yet administered. Partial anchors exist in SV3.

Does this student generate solutions, adapt when plans change, and act without waiting to be told? This matrix maps directly to the PathCredits Creative Innovator (CI) profile. The entrepreneurship learning block from SV3 provides a partial in-program anchor (66% fill for leadership course students). All seven alumni rating items (Q10–Q16) and the open-text creative project narrative are the primary scoring inputs and will be available once the alumni survey is administered.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	Entrepreneurship learning from course	SV3	On a scale of 1–10, how much did you learn about being an entrepreneur? (Leadership Course Survey — 66% of participants) · What tools do you now know to be an entrepreneur? (Open Text, 66%) · List 5 things you learned about being an entrepreneur (Open Text, 66%) <i>Limited to ~222 students who completed the cohort-specific entrepreneurship section</i>	Partial
2	Multi-solution generation	AQ	Q10: On a scale of 1–7, when you face a problem, how often do you come up with multiple possible solutions before picking one?	Pending
3	Idea generation in group settings	AQ	Q11: On a scale of 1–7, how often do you come up with ideas or suggestions in group settings?	Pending
4	Adaptability to unexpected change	AQ	Q12: On a scale of 1–7, how well do you adapt when a project or plan changes unexpectedly?	Pending
5	Openness to critical feedback	AQ	Q13: On a scale of 1–7, how do you respond when feedback challenges your original idea? (1 = defensive, 7 = open and adjusting)	Pending
6	Self-initiated action	AQ	Q14: On a scale of 1–7, how often do you take initiative to start something new rather than waiting to be told?	Pending
7	Constructive feedback giving	AQ	Q15: On a scale of 1–7, how comfortable are you giving honest feedback on someone else's idea?	Pending
8	Creative project narrative	AQ	Q16: Describe a project where you had to come up with a creative solution — what did you do? (Open Text) <i>Highly NLP-scoreable for reasoning depth, solution specificity, and initiative language</i>	Pending

Does this student dig into root causes, break problems apart, and reflect honestly on what went wrong? This matrix maps to the PathCredits Critical Thinker (CT) profile. All six scoring inputs are Alumni Survey items Q17–Q22. Four are self-rated Likert items on analytical behavior; two are rich open-text narratives ideal for NLP analysis of reasoning quality, self-awareness, and problem-decomposition depth. No current dataset captures this dimension at scale — it requires the alumni survey.

#	SUB-DIMENSION	SOURCE	COLUMN / QUESTION	STATUS
1	Root-cause orientation	AQ	Q17: When I encounter a problem, I try to understand its root cause before taking action. (Rating 1–7)	Pending
2	Problem decomposition	AQ	Q18: I break complex problems into smaller parts to better understand them. (Rating 1–7)	Pending
3	Systems improvement thinking	AQ	Q19: I often think about how current processes, systems, or activities could be improved. (Rating 1–7)	Pending
4	Ambiguity tolerance	AQ	Q20: How comfortable are you tackling a creative challenge or project that has no clear, standard answer or instructions? (Rating 1–7)	Pending
5	Complex problem narrative	AQ	Q21: Tell us about a problem that seemed simple but turned out much more complicated — what steps did you take? (Open Text) <i>Scoreable for reasoning chain length, step specificity, and self-correction awareness</i>	Pending
6	Reflective failure analysis	AQ	Q22: Tell us about a project that could have gone better — what went wrong and what would you do differently? (Open Text) <i>Strongest indicator of genuine self-awareness; distinguishes students who reflect vs. deflect</i>	Pending
