- OBJECTIVE** Software Engineering student seeking a full-time co-op/internship in software development or systems design for Spring/Summer 2026.
- EDUCATION** **Rochester Institute of Technology, Golisano College of Computing and Information Sciences**
Bachelor of Science, Software Engineering Major *Anticipated May 2027*
- GPA: 3.0 | Awarded Dean's List (Spring 2025) | ENGAGE Scholarship (Merit-Based)
 - **Relevant Coursework:** Software Design for computing systems, Web engineering, Human-centered requirements and design, Software process and project management, Software testing, Intro to software engineering, Engineering of software subsystems, Cybersecurity, Database systems, Computer systems concepts
- SKILLS** **Technical Skills:**
Programming Languages: Python, Java, C++, C#, JavaScript, HTML, CSS, SQL, API development and Integration, object-oriented design
Operating Systems: Windows, Linux(Ubuntu), macOS
- PROJECT** **Musical Instrument Digital Interface (MIDI) App** **Jan 2025 - Apr 2025**
- EXPERIENCE**
- Created a cross device application handling MIDI protocols for real time music playback.
 - Designed C++ software to control MIDI playback with Play, Pause, Stop, and Next functions.
 - Implemented dual-mode input system supporting both terminal commands and physical buttons
 - Integrated LED feedback and event-driven state handling for real-time playback control.
- COMIX GUI application** **Oct 2024 - Nov 2024**
- Built a GUI-based comic book management app with tools for searching, adding, and editing comics.
 - Implemented import/export functionality using CSV/JSON/XML and persistent data storage.
 - Collaborated in a team to combine different subsystem designs into a functional application.
- EXPERIENCE** **RIT SCOOP** **Remote**
Software Engineer Intern **Aug 2025- Dec 2025**
- Contributed to the development and maintenance of SCOOPortal, a web application supporting the RIT SCOOP program for students and faculty.
 - Refactored complex React modal components to improve usability, state handling, and error management across multiple user roles.
 - Led UI debranding efforts, updating styles, labels, and more for new platform requirements.
 - Implemented and enhanced confirmation modals to prevent accidental data loss and improve user feedback during form submission workflows.
- UpperLine Code** **Remote**
Software Engineer Intern **July 2023 - Aug 2023**
- Created a web application using HTML and JavaScript to display local recycling centers.
 - Collaborated with a partner, focusing on frontend development.
 - Designed a user-friendly interface and integrated location based search functionality.
 - Presented the project to a cohort of peers, explaining the development process and features.
